

Salamantex

THE EASY WAY FOR CRYPTO PAY

About Salamantex

Salamantex is a fintech and blockchain company from Austria, allowing companies of any kind to accept cryptocurrency payments in exchange for their products or services.

Our main focus is to build a whole crypto payment ecosystem, easy to use for everybody.

1. Crypto payment software

We have developed a crypto payment software that allows businesses to accept cryptocurrencies easy and safe, without any pre-knowledge of cryptocurrencies. There is no setting up and managing of different wallets, no manual exchange of cryptocurrencies in fiat and no manual accounting necessary. All of this and more is taken care of by our system.

- Our software can be integrated in existing cash register systems and can be used on any smartphone or tablet.
- It is possible to keep the received cryptocurrencies in a merchants owned wallet or have it instantly converted into FIAT money (EUR, USD, CHF etc.) during the payment process.
- The merchant will get a monthly statement of all transactions and fees - for perfect and complete book-keeping.

2. Crypto Payment Terminal

- In addition, we distribute self-developed POS terminals with our pre-installed payment software. Other applications for alternative payment options, can be installed as well.

3. Software development and solutions for companies

- Individual blockchain solutions for companies
- Active support in projects
- Consulting in blockchain technology
- Setting up and developing of blockchain networks

For further information about our products or services, do not hesitate to contact us.

Salamantex
